

How to use Rednote

Rednote

Add music and emotion to your texts 🎵

Have a band you would like to see on Rednote? Tell us.

Rednote is always looking for new artists to partner with. If you want to see your favorite local artist on our app contact Alexandra Duff at aduff@rednote.com

Rednote is designed to be quick and easy to use. Simply go to our website or download the app, pick a song, play it and send it!

Rednote

Show Some Emotion

Rednote is a free app that allows users to send short song clips to their friends. Clips can be sent either from your phone or computer. The app is available on both the App Store and Android Marketplace.

VH1 Save the Music Foundation

VH1 Save the Music Foundation sponsors music programs in public schools across the nation. The foundation believes in the ability of music to help youths grow and learn, as well as provide a great outlet for their emotion. It provides the funding to ensure those classes are not cut.

Rednote is dedicated to supporting new independent artists. That is why we created our Indie Music Program. We find local independent artists across the nation and give them an opportunity to partner with our app. We add their music to our app, allowing their fans to send clips of their favorite songs via our app.

Savoir Adore

Just two years ago Savoir Adore rehearsed their songs in their Brooklyn apartment. Today instead of a smoke-filled apartment in Brooklyn they are sitting in an apartment in Rio de Janeiro. Instead of rehearsing for a performance at an open-mic night at a bar down the street they are rehearsing for their own sold out concert in Brazil.
